Treatment Basin Maintenance Update

Filter Plant Basin Cleaning

The annual cleaning and maintenance of Basin 3 at the Filter Plant was completed last week. After being drained, cleaned, inspected, and repaired as needed, the basin was returned to service on July 19. **Shoutout to the M&G team - Jordan, Braden, Barry, Dale, Scott, Dave, Mike, and Chris for their hard work and dedication in completing this important maintenance project !** Basin 4 is scheduled to be taken out of service next, with cleaning planned for the week of July 27.

Employee Engagement Happy Hour

Mid-Summer Meetup

The Employee Engagement Committee hosted a Happy Hour at Collusion Tap Works on Wednesday, July 22, bringing employees together for an evening of conversation and connection outside the workplace. Thank you to everyone who attended and helped make the event a success. The Employee Engagement Committee appreciates the continued participation and support of its events.

Continuous Learning In Action

Wastewater Team Completes Dosing Pump Training

The Wastewater team recently participated in dosing pump training focused on equipment maintenance, troubleshooting, and industry best practices. The hands-on session provided valuable experience to help improve operational efficiency and reliability. Thank you to the Maintenance & Grounds team for providing the training station and creating an engaging environment for practical learning. Thank you to everyone who participated and continues to support a culture of continuous learning and improvement.

Projects Underway

Houston Run Tank Rehabilitation

Rehabilitation work on the Houston Run Tank is in progress. The tank has been taken out of service and fully drained to allow crews to media blast, inspect, repair, and recoat both the interior and exterior surfaces. The project is expected to take approximately eight weeks, and work is now at the halfway point. The photo shows scaffolding being installed around the tank as crews prepare for the exterior rehabilitation and painting phase.

Emergency Water Main Repair

Market Street Bridge Emergency Water Main Repair

In late June, Kinsley Construction completed emergency repairs to a 12-inch transmission main beneath Codorus Creek after it was accidentally damaged during bridge deck boring work. The repair required temporary stream diversion with Aqua Dams, specialized excavation, and removal of the concrete encasing of the pipe before the damaged section was replaced and the streambed restored. The main is scheduled for ice pigging and water quality sampling this August before returning to service.

ERP Training Success

MWM Mobile Success

On July 21, 2026, Joe Skehan, Operations Services and Supply Chain Manager, conducted a live ERP demonstration for the shop team, providing hands-on training with the new system. **Congratulations to Corey Koller and Jonathan Colon, who successfully completed the test work orders using MWM Mobile. Great job to everyone involved as we continue making progress with our ERP implementation!**

Progress Continues on Critical Infrastructure

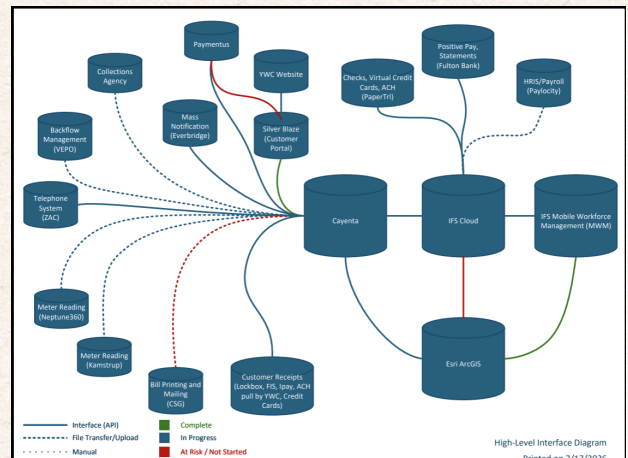

S. Penn Street Bridge Water Main Installation

Construction continues at the S. Penn Street Bridge in York City, where crews are installing a new 24-inch steel casing and 16-inch transmission main. In July, Kinsley Construction installed the support beams and began installing and welding the casing, with the insulated carrier pipe scheduled for installation at the end of the month. Once complete, the new crossing will improve system reliability and allow the retirement of a 20-inch cast iron water main installed in 1898.

Team Raptor Updates

Look What We're Building Together!

Team Raptor continued making strong progress in July as employees across York Water collaborated to prepare for our new business and customer service systems. This month included testing key business processes, preparing data for migration, planning employee training, and strengthening system connections. **Next, the team will focus on getting all remaining system connections to green, marking each integration as complete and ready for implementation. Thank you to everyone contributing their time, knowledge, and teamwork!**

Celebrating Our Team

Upcoming Birthdays

Jack Goodwin (*Retiree*) - 08.01
Dilmaris Diaz - 08.01
Cynthia Howell (*Retiree*) - 08.03
Jane Vivier - 08.05
Laura Wand (*Director*) - 08.14

Kudos Corner

Congratulations to Kevin Myers on earning his
 ITCP Manhole Rehab Version 2 Certificate
 and recertifying his NASSCO PACP, LACP, and
 MACP certification. Thank you for your
 commitment to continuous learning!

Helping Hands Make the Job Easier

Wastewater Operator **Eric Selak** and Senior
 Operator **Adam Wolf** teamed up to move a truck
 tonneau cover, demonstrating that teamwork and
 cooperation help get the job done safely and
 efficiently.
