

## Around York Water

Operations and Engineering staff, along with our consultant, GFT, conducted the annual safety inspection of the Roxbury Dam on June 4<sup>th</sup>. This year's work included testing the various outlet gates that control the discharge from the reservoir, and inspecting the interior of the outlet tower, which is normally filled with water.

The valves at Roxbury Dam were also exercised. These valves are critical for the safe operation of the dam and were due to be inspected and operated. We are happy to report that the valves are in great working condition.

# WELCOME TO THE TEAM

**Lillian Reynolds**  
Wastewater  
Technician

**Cayden Noye**  
Distribution  
Technician

**Franselis  
Rodriguez Mejia**  
Cust. Service Rep.

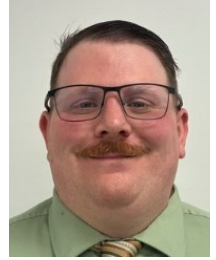

**Ethan Lane**  
Filter Plant  
Technician

**Ted Skehan**  
IT Intern

**Chase Billet**  
Asst.  
Wastewater  
Supt.

**Darryl Main**  
Asst. Supply  
Chain & Ops.  
Services Mgr.

Congratulations to Andrew Prosser and his wife Julia on the birth of their daughter, Cora Francesca, who was born on June 25<sup>th</sup>!

Congratulations to Luis Rivera, whose softball team recently went 6-0 and won the 50 AAA championships in Virginia.

Two baby Killdeer recently hatched in the parking lot at 1801 Mt. Rose Ave. You can spot them wandering around near the front entrance, usually under the parked cars in the same 50-yard stretch.

Killdeer are federally protected birds, and they will probably hang around for the next 40 days or so until they're big enough to fly and move to a different area.

Nick Schaefer took these awesome photos of them.

## KUDOS

We have recently received some kind words from customers. Thank you for all you do to go above and beyond for our customers!

- ◇ **Brenda Goldsmith** was very pleasant and made a customer feel much better about their situation after speaking with her.
- ◇ **Lenny Velez** provided great customer service when helping a customer identify a service line leak.
- ◇ **Kevin Myers and the Construction team** provided exemplary service in diagnosing and resolving a customer's water pressure issues following a new lateral installation.

Shea Juergens recently went on vacation to Hawaii. While she was there, she visited a few local water companies.

A summer main break took place on Carlisle Avenue on the day of the “Rock the Country” music festival at the York Fairgrounds. The Distribution team was able to make the repairs and be off the road prior to the festival, avoiding major traffic backups. Great job, team!

On June 18<sup>th</sup>, York Water hosted this year’s Crispus Attucks Codorus Corridor Summer Enrichment Program students and leaders. Brett Steers and Steve Metzler provided tours of YWC’s source water and treatment facilities, with assistance from Jason Stott and other York Water employees. The students will be presenting what they have learned at their Annual Community Showcase on July 25<sup>th</sup> at the Keystone Kidspace facility.

During the recent high temperatures, we have been providing cold water for our customers that visit our Customer Service team at the Main Office. We welcome dozens of customers through our doors every single day, and we are happy to keep them hydrated.
